To Whom It May Concern:

Speed Global Services has been a partner with Wild Eye Designs Inc. since 2008. Since partnering with Speed Global Service, or SGS, they continue to accommodate, communicate and hold themselves accountable to the same standards we set out initially. These areas are what we view as being most important to our company's growth and development and Speed has been more than willing to work and make these areas a priority during our tenure with them.

Speed Global Services provides a full range of expertise in freight forwarding and warehouse logistics. SGS has been accommodating to us on many levels, most specifically in streamlining out seasonal fluctuation of work load. During our busy seasons SGS has always been accommodating in ensuring that our standards in shipping are upheld. Our company prides it's self on timely customer service and Speed since the beginning has always worked with us to ensure that this is their priority too. In addition to accommodating our daily needs as our company grows our lines of communication have had to develop along side this.

Speed Global Services has helped to grow and bridge out communication needs effectively between our independent locations. Since we can not be present at their location our communication has had to be strong suit between both parties and is a reason why we continue to do business with Speed. They are easily accessible for help, and have helped work with us to create more streamlined reporting and auditing processes to ensure we are constantly in the know of what is happening at any given moment. This has helped to grow our business and realize our capabilities and potentials.

Lastly, SGS has always held their business accountable to us even when things did not run as smoothly as they do now. Speed is a company willing to work with our business on all levels from the ground floor to office administration. They have developed a strong rapport with us by holding themselves accountable to the same agreements that they committed to years ago.

I would recommend Speed Global Services for these reasons and more, and feel that they are a truly effective partner in our continuing successes.

Sincerely,
Warren Horwitz
VP Sales & Marketing
