## Warehouse Services Menu

**Inventory Status:** View real time inventory levels, by item, lot or all

**Order Status:** View, print or export details of order, including status and tracking information

**Personal Views:** View, print or export receipt details, item transaction history and any custom views created just for you

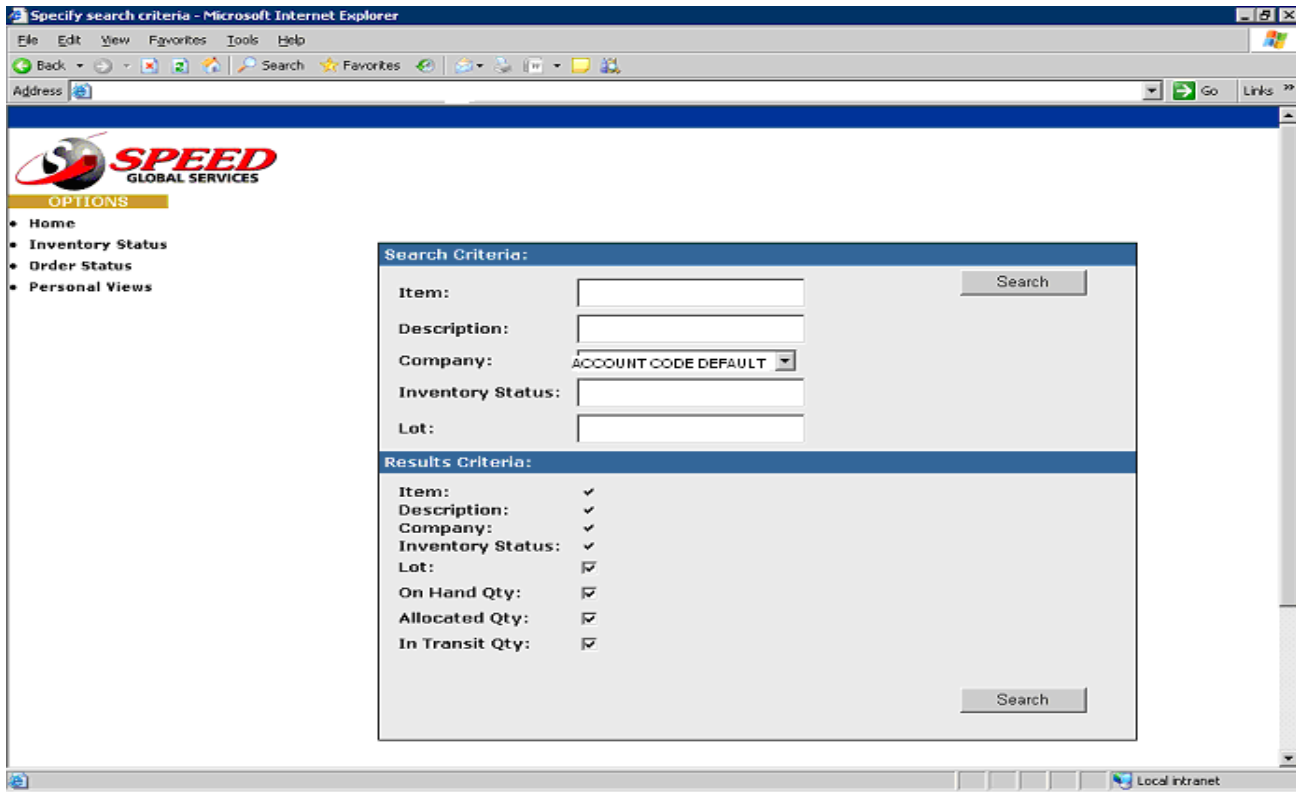

## Warehouse Services

View Order History,  
Tracking Information,  
Realtime Inventory,  
and Receipt History

### Inventory Management

### Inventory Status

Inventory Status has been selected from the menu – the search criteria fields work in several ways

- 1) enter specific information like item number or lot number or combination of and click on the search button
- 2) enter partial information with the system's "wild card" (%) and the results will come back with all items with containing your search parameters. The wild card can be used before, after or before and after the data entered.  
Ex: You want to search for all items that start with 372, enter 372% in the item field and click search  
You want to find all lot numbers ending in 2074P, enter %2074P in the item field and click search  
You want to find all products that contain the word(s) 15 oz, enter %15 oz% in the description field and click search
- 3) the system looks at a blank field as meaning "all" – if you want your entire inventory, leave all fields blank and click search

\* Note the wild card can be used throughout the system in any search criteria fields

Done Local intranet

This view was generated by entering a specific item number. You will notice that there is a separate line item for each lot number in inventory. By clicking on the item number link ( [11108171](#) ) you will see a sum of all lot numbers (total qty). – next page

#### Definitions of Quantities:

On Hand Qty = total product physically in our warehouse

Allocated Qty = quantities allocated to orders currently in the system (these qtls are included in the “on hand”)

In Transit Qty = quantities currently anticipated due in on an inbound receipt

**Search Criteria:**

ERP Order:

Order Type:

Customer P.O.:

User Defined Field 1:

Customer Name:

Customer ID:

Customer Postal Code:

Company:

Ship To:

Ship To Postal Code:

---

Order Date: (From)

(To)

---

Deliver After: (From)

(To)

Done Local intranet

By selecting Order Status from the main menu this search criteria window is produced. You can enter specific information to narrow your search results and/or use the wild card.

- ERP Order** = your sales order, invoice number or any reference number generated and defined by you for tracking purposes
- Order Type** = not currently in use
- Customer P.O.** = your customer purchase order number
- User Defined Field 1** = this field is open and can be used to reference any information you may want to track (i.e. a promotion code, a docket number, a salesman code, etc...)
- Customer Name** = you may use this field to search a customer by name, the wild card works well here so only partial information needs to be entered
- Customer ID** = we prefer to import your customer list and corresponding customer numbers which can be tracked here, this is the bill to on the transaction
- Customer Postal Code** = bill to zip code
- Company** = defaulted to your account code
- Ship To** = ship to customer code
- Ship to Postal Code** = ship to zip code

[Home] [Inventory Status] [Order Status] [Personal Views]

This view shows the container information and tracking numbers or PRO #

If shipped via courier (UPS, Fedex, etc..) you will see the tracking numbers associated with each container number. You will notice you can expand (“+”) the container ID number and see the contents of each carton shipped. This is especially helpful in the event a loss or damage claim needs to be filed with the carrier/courier

If the shipment is moved via truck freight (LTL or FTL) you will see the carrier PRO number referenced.

Please note, for your convenience, you have the option to [Export to Excel](#) throughout the system
