Bangladesh is Experiencing Higher than Normal Congestion

Dear Valued Customer,

Bangladesh is experiencing unexpectedly high shipment volumes during its already busy season. Air shipments are also feeling effects as ocean freight congestion drives shippers to look for alternatives. Failing infrastructure and weather are also causing volatility in the movement of freight.

The airports are running out of places to receive freight, as a new security policy with tighter protocols has slowed the clearance of goods for shipment. Flights are also being cancelled due to a lack of passengers. Shippers are urged to book their air freight at least a week in advance.

The congestion is expected to challenge shippers through the month of August. Please reach out to us if you have questions or want to discuss ways to mitigate the effects to your supply chain.

Sincerely,

The Speed Global Team
